

PRESS RELEASE

Company's pledges its support towards Make-in-India movement

Servotech Power Systems Limited is in the business of manufacturing of Solar related products and industrial LED Lights. Our Company is a MSME Company which thrives to establish itself as a leading manufacturer of LED lights by providing good quality lights at affordable prices to the masses. We believe that "**Our quality is our strength**", we ensure that all our products satisfy global standards to compete with international LED markets with **our Made in India Products**.

A close study of the trends prevailing in the market suggested that poor quality Chinese products dominate the unorganized retail sector. This sector comprises domestic MSMEs, producing more expensive but better quality products. It was realised by the government of India ("GOI") that there is an urgent need to promote domestic MSMEs. Considering the same, GOI introduced **Make in India** project with an objective of uplifting the manufacturing standards and capacity in our home country.

Make in India is a Government of India scheme launched by honourable Prime Minister of India Sh. Narendra Modi in 2014, intended to boost the domestic manufacturing sector and also augment investment into the country. It aims to revive the lagging manufacturing sector and spur the growth of the economy. The long-term vision is to gradually develop India into a global manufacturing hub, and also boost employment opportunities in the country and that will begin by establishing strong roots of MSME industries in India.

At Servotech, we believe that manufacturing is our national pride and strength. We follow the philosophy which is also accepted by the Confederation of All India Traders (CAIT) that comprises 60 million merchants across the country, it has embarked on a new campaign, '**Indian Goods – Our Pride**'.

Presently, our company is very much dependent on Chinese industry for supply of raw materials and other related components for our products, we pledge to move ahead in future, our aim is to shift our supplier base from Chinese markets to Indian markets while developing and upgrading Indian manufacturers in the same domain. During the current pandemic situation, our country is undergoing huge economic crises due to lack of equipments and other facilities to protect ourselves from the deadly virus. We are surrounded by the Chinese product even in these tough times may it be sanitizers, disinfectants etc. We realised the need of the hour and decided to become self-dependent and make our society free from Chinese disinfectants. We felt that this is the right time to take a definite step in this direction and align ourselves with the theme of "Atm-nirbhar Bharat" or "Self-Reliant India". For this, we are engaging with various manufacturers within India for product development activities and are confident that we will become a Self-Reliant, Make-in-India organisation in near future.

Servotech is now introducing the UVC technology, which can help us to fight against the virus and save many lives during the current pandemic situation. UVC technology has a long proven history of killing viruses, bacteria and pathogens present in the environment by destroying their DNA within seconds, without addition of chemicals and harmful side effects. By this we not only aim to introduce a complete sanitization solution to our people but also at the same time to contribute towards the objective of “**Make in India**” movement by boycotting Chinese products. Further, our Indian manufactured UVC products are capable of competing in international market, making us self-reliant and helping us to become the main stream Indian disinfectant manufacturer.

About Servotech:

Servotech is a leading Manufacturer of industrial LED lights and Solar related Lighting Products in India. We have been in business since 2004 and have supplied products mainly in India with the exception of business activities in Germany & Great Britain. We are a Delhi based company with the 80000 sq feet manufacturing plant situated at Kundli Industrial area in the state of Haryana with a total of 135+ employees, including workers and academic professionals of which thirteen are R&D experts. We also operate a complete testing lab for all types of LED lights and Solar PV components. Our products are ISO 9001:2008, ISO 14001, CE & BIS certified to supply a consistent quality in our products.

The Company manufactures a wide range of environment friendly products namely industrial LED tube light, street light, floodlight, canopy light, panel lights, bay lights, yard lights and solar related products such as home lights, solar street lights, solar power plant/panel, solar pumping system and lithium batteries. Please visit www.servotech.in for more information.

The Company's philosophy is to improve the life of people with our products and to support a healthy ecosystem. We currently produce industrial LED Lights & Solar related home lighting system products mainly for India with production capacity of 1.6 Million systems/annum. In order to support the Government of India with Make In India project we are boycotting all the imported products and planning to introduce Indian manufactured product in International markets.
