(MENAFN- GlobeNewsWire - Nasdaq) LONDON, Oct. 12, 2021 (GLOBE NEWSWIRE) -- According to The Business Research Company's research report on the oxygen concentrators market, companies in the oxygen concentrators market are increasingly investing in technologies such as artificial intelligence and low-cost portable devices to improve the functionality of these oxygen concentrators. There has been a growing demand for portable, low-cost concentrators owing to the pandemic.

For instance, in March 2021, a team of researchers at MIT's Electrochemical Energy Lab (EEL) launched a low-cost portable concentrator that can be adopted in places with limited infrastructure and high demand. Servotech Power Systems, an India-based manufacturer of LED lights and solar products, is manufacturing the noiseless, lightweight, and portable oxygen concentrator equipment that provides a constant flow of oxygen and can be easily adjusted to meet the needs of the patient.
