

UVC Air Purifier

The Air Purifier from Servotech features the world's thickest HEPA filter for ultimate disinfection, a strong fan for optimal air circulation, and the world's highest certified clean air technology for unmatched test results against viruses, bacteria, hazardous gases, and VOCs. The equipment is suited for full disinfection under positive pressure. Positive pressure is necessary to ensure that indoor air contaminants do not spread from one room to another, making it suitable for quarantine, containment, and infection control rooms.

FEATURES

Low Noise

Operates at extremely low levels of noise.

PM 2.5 Sensor

Detects the air quality in real time and adjusts to the best purification mode

HEPA-13 Powered

For impeccable UV air purification results
