

UV-C DISINFECTION SYSTEMS

Fight Germs With The Power Of
UV-C Germicidal Lamps

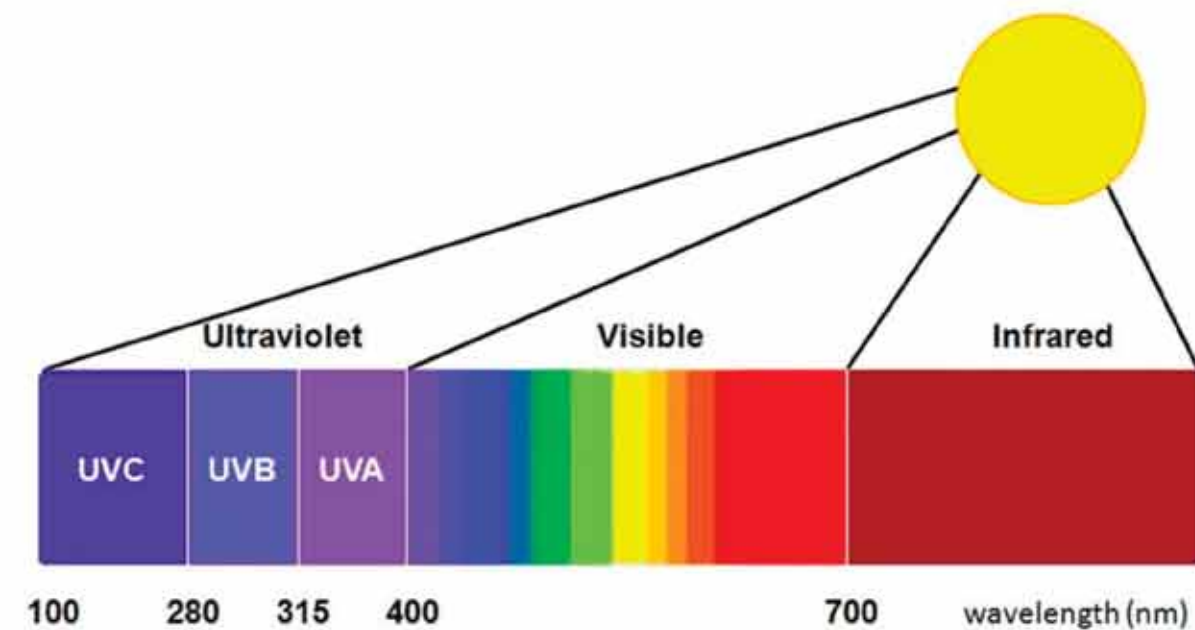

PROVEN DISINFECTION METHODOLOGY

Breakdowns The DNA RNA Structure
Of Pathogens

WHAT IS UV-C LIGHT?

Servotech's Disinfection Systems use UV-C light which is a proven disinfection tool against harmful bacteria, viruses, molds and spores.

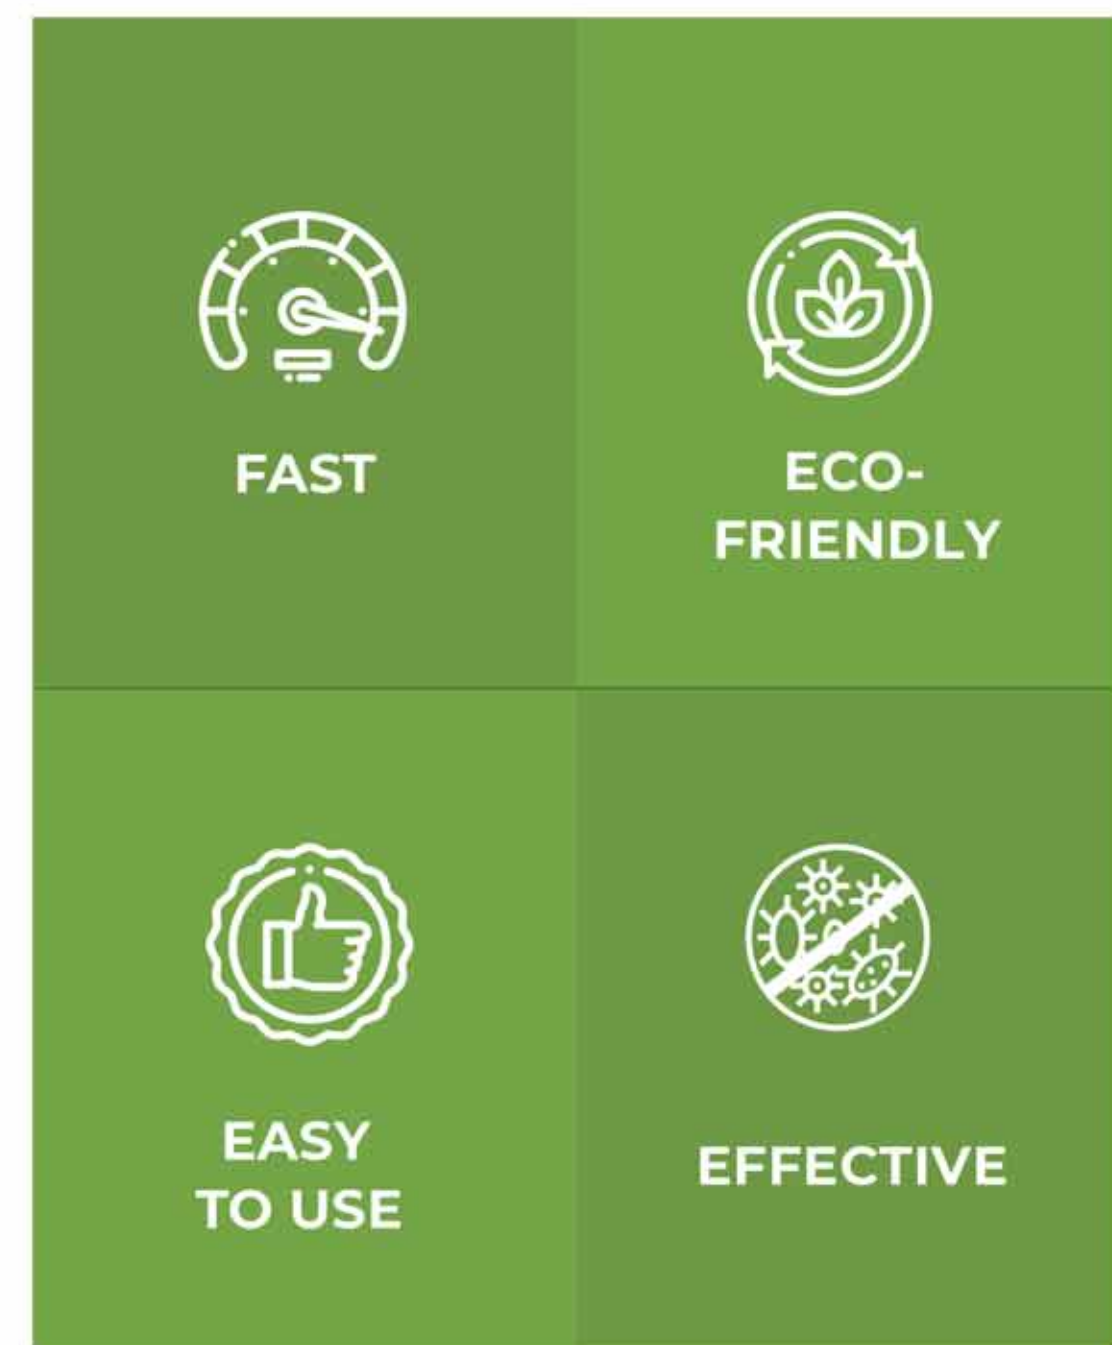

It's radiations of 254nm wavelength damage the DNA code or RNA of these pathogens and trigger lethal mutations that prevent them from reproducing.

BENEFITS OF UV-C LIGHT

Servotech's UV-C Disinfection Systems are fast, effective, eco-friendly and easy to use. Along with your conventional cleaning tools & methods, use Servotech UV-C Disinfection System to sanitize your working & living environment and make it more safe.

The best part is that the entire process does not leave any residue and hence there is no need to remove or neutralize any harmful agent after the disinfection process. Since no chemicals are being added to the Air & Water there are no harmful toxic chemicals that have to be disposed off.

SAFETY PRECAUTIONS

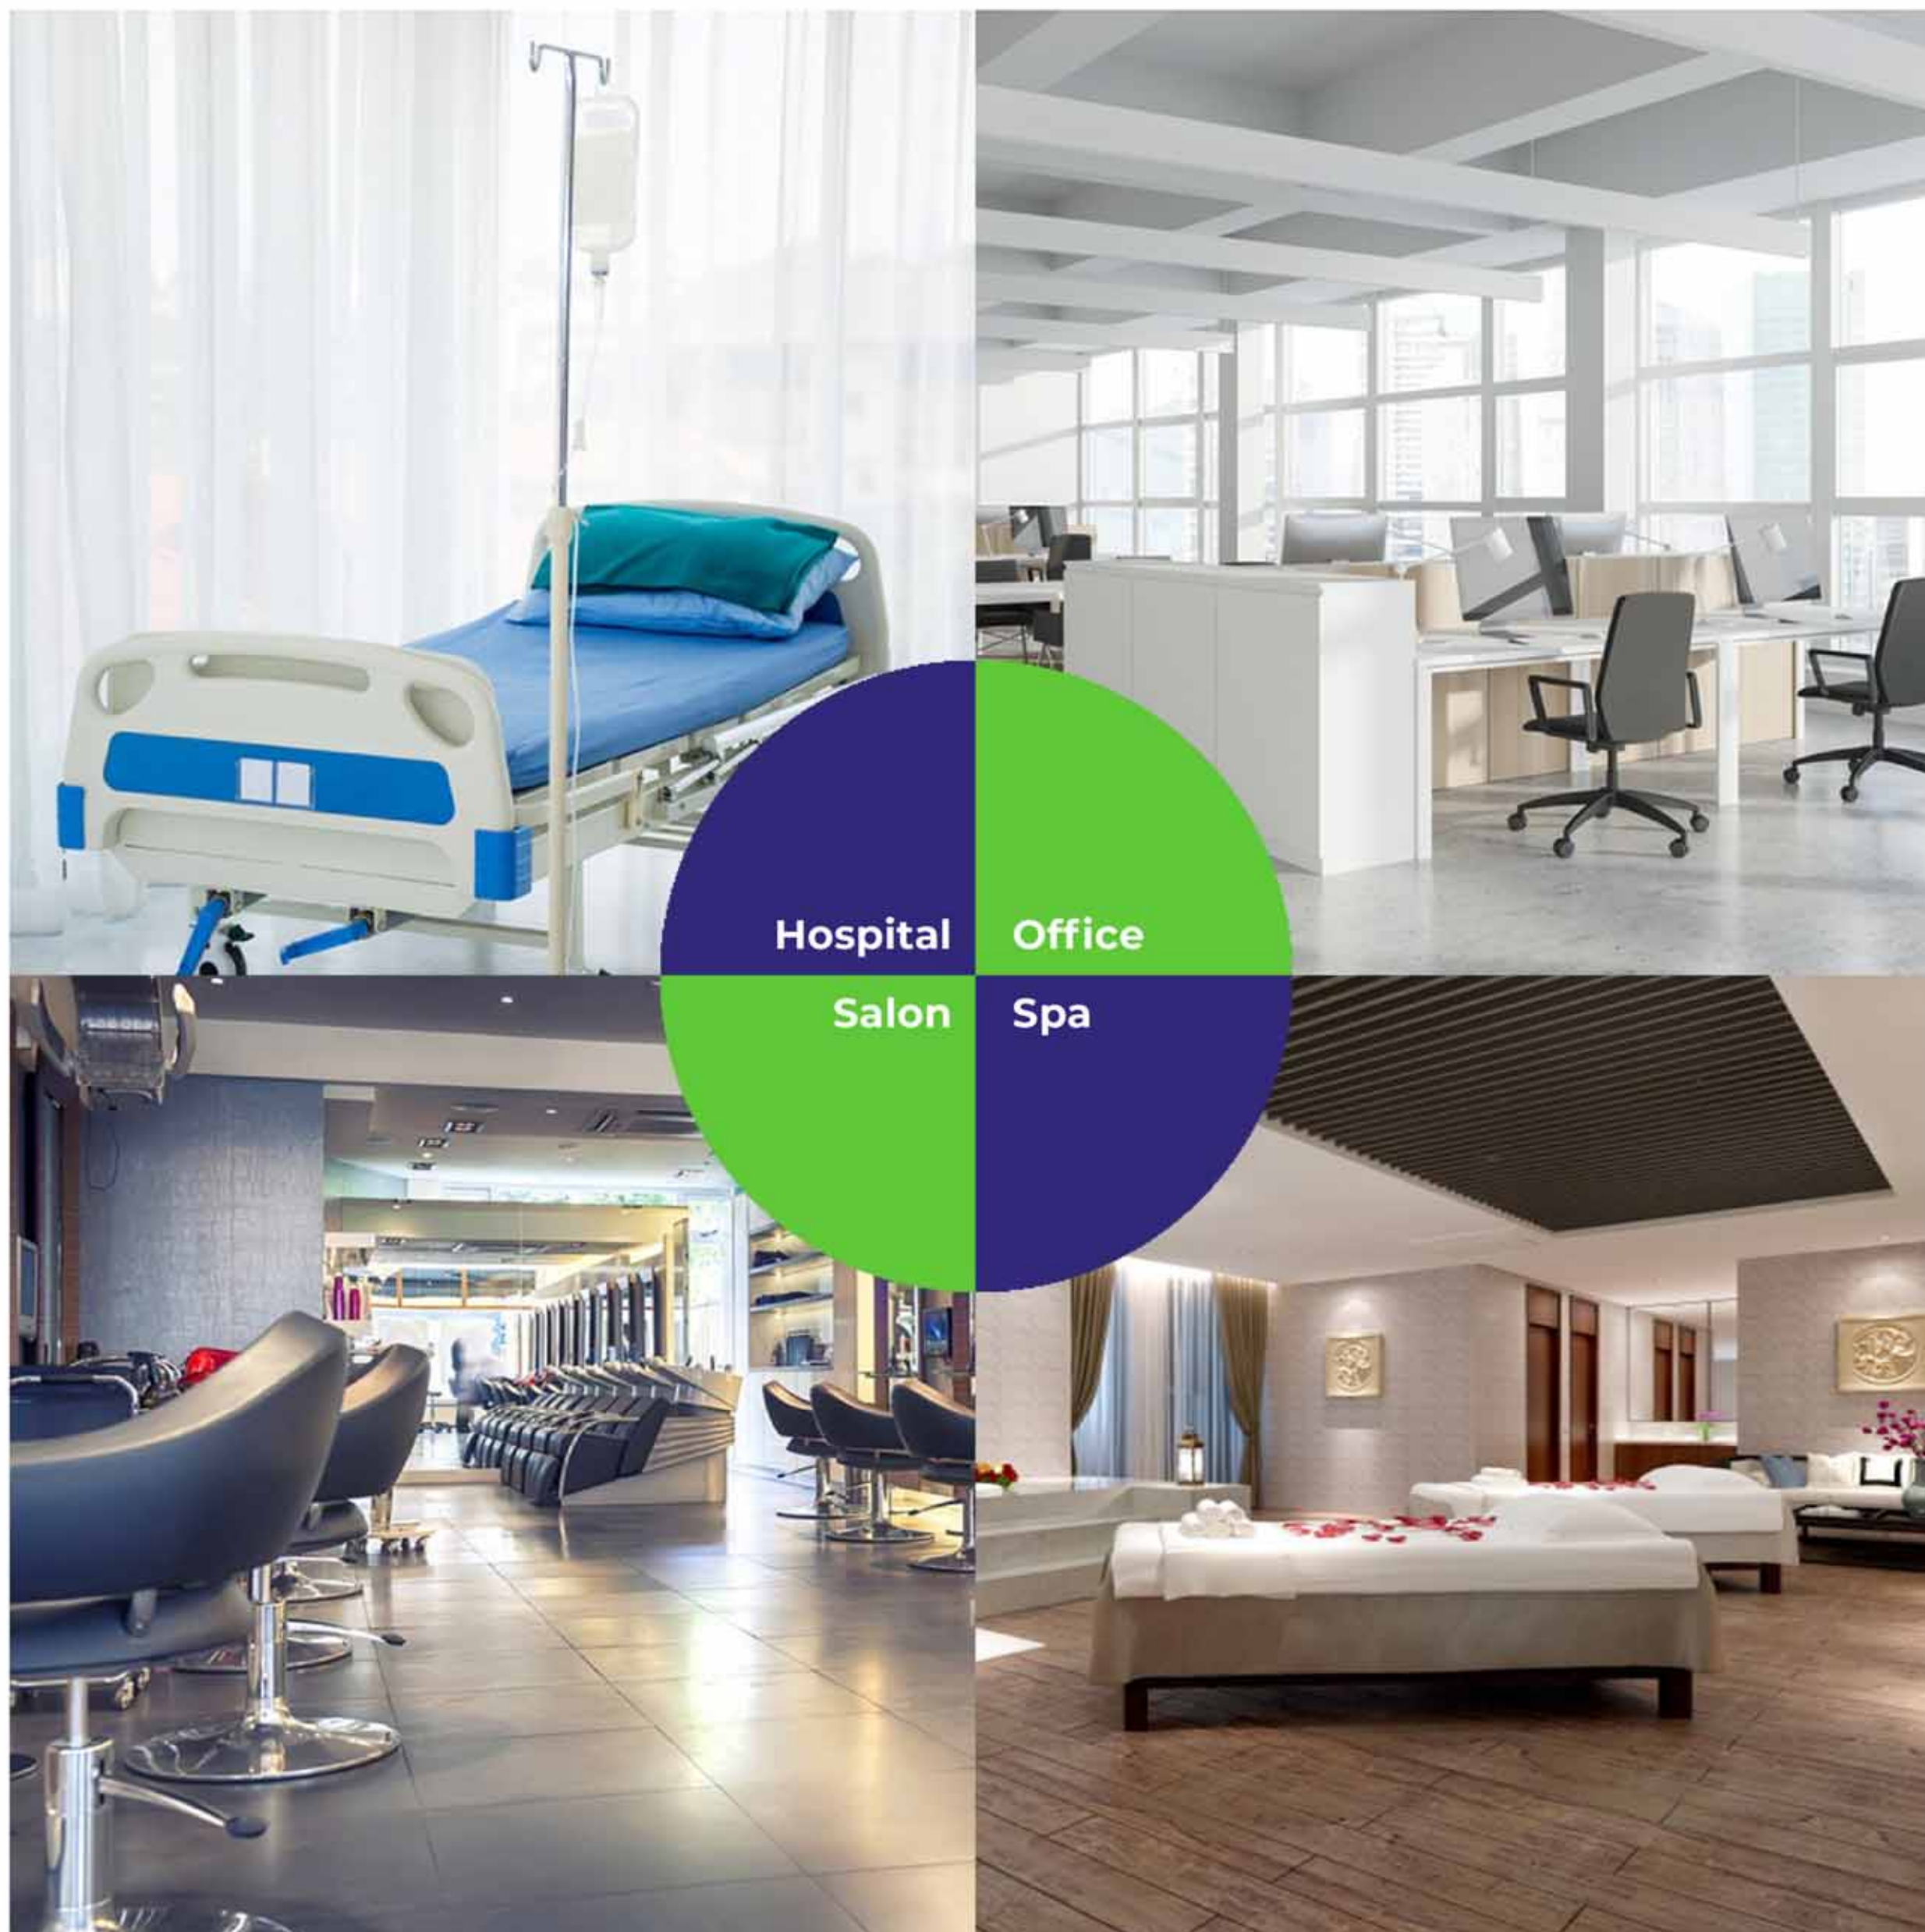

The only precaution that needs to be taken while using these systems is that the area to be disinfected should be completely screened off. There should

be no plants, humans or pet animals when the disinfecting is in process as the ultraviolet rays emitted during it are harmful to skin and eyes.

APPLICATION OF UV-C DISINFECTION SYSTEMS

The UV-C Light has widespread applications and can be used to reduce the risk of virus & bacteria transmissions in your environment.

UVLEN Digital Sanitizer deliver the necessary amount of far-UVC wavelength without damaging skin cells, subsequently killing Bacteria & Viruses!

SANITIZE ANYTHING

With the UVLEN Mobile App you can select to sanitize Face-Masks, Keyboards, Mouses and other daily accessories.

TECHNICAL SPECIFICATIONS

Model- UVLEN

Type : FAR UVC

Operating Wavelength : 222 nm

Overview Of Handheld UVC Disinfection Lamp UVC-6w

PRODUCED UNDER THE
MAKE IN INDIA INITIATIVE

CHILD LOCK

Special button to lock and
unlock lamp.

POWER

6 Watt

5 SECOND SAFETY DELAY

To help you move out of the
way before it starts.

PORTABLE

A travel friendly rechargeable,
portable and light weight lamp.

RECHARGABLE

It can be powered by battery or
USB charge.

STERILIZATION AREA

5-9 cubic space.

TECHNICAL SPECIFICATIONS

Model- UV- C Handheld

Lamp Type- UVC

Operating Wavelength : 254 nm

Overview Of Portable UVC Disinfection Lamp (UVC-36WHS)

PRODUCED UNDER THE
MAKE IN INDIA INITIATIVE

PRESET TIMER & REMOTE CONTROL

15, 30 & 60 min preset timers
for disinfection

STERILIZING FACTOR

UVC 253.8Nm

STERILIZATION AREA

200-400 square feet.

HUMAN SENSOR

Turns off automatically when
it sense human presence

UVC WITH OZONE

To help you use it from a safe
distance

15 SEC SAFETY DELAY

To help you move out of the way
before it starts

TECHNICAL SPECIFICATIONS

Model- UVC Disinfection Lamp - 36 Watt
