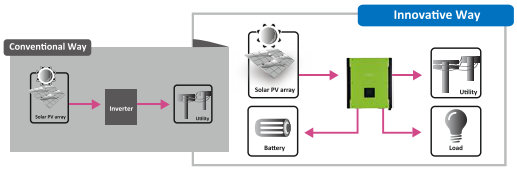
GREEN LIGHT

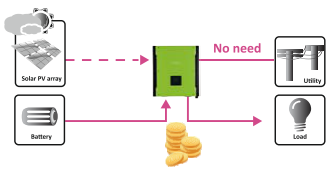
MPPT SERIES HYBRID GE (SINGLE PHASE)

CORE FEATURES

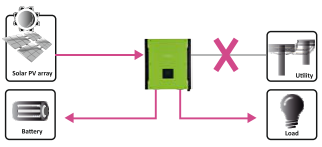
Introducing a flexible and intelligent hybrid solution, Green light Inverter that intelligently utilizes solar power, AC utility, and battery power to supply a constant flow of power. Specially meant for domestic or household use Green Light is a simplistically smart solar power storage system that stores and holds energy into a battery for anytime utilization as per the requirements. Priority for power source is programmable through smart software. During unexpected power failures and faults at any given point of time, It would automatically consume the reserved power from the battery thereby eliminating the dependence on the electricity significantly.



FEED-IN POWER TO THE GRID AND ALSO STORE SOLAR POWER TO THE BATTERY



SAVE MONEY BY DISCHARGING BATTERY FOR SELF-CONSUMPTION FIRST



POWER BACKUP WHEN AC POWER FAILED

- Self-consumption and feed-in to the grid
- Programmable supply priority for PV, Battery or Grid
- User-adjustable battery charging current suits different types of batteries
- Programmable multiple operations modes: Grid tie, Off grid, and grid-tie with backup
- Built-in Timer for various mode of on/off operation
- Multiple communication for USB, RS-232, Modbus and SNMP
- Monitoring software for real time status display and control
- Custom-made firmware by ODM contract
- Parallel operation up to 6 units for 5KW / 10KW and 15KW
