Servotech, the Country's Leading Solar Solutions Provider, Begins Super Distributorship Program in Rajasthan

Jaipur, Rajasthan: Rajasthan has become India's solar energy hub. About 50,000 MW of solar power capacity has been developed in the country, of which Rajasthan tops with 22% of total solar power generation. The state government has set a target of developing 30,000 MW of solar power capacity by the year 2030 and for this, new solar parks are being developed continuously in the state. Plus, Rajasthan government has signed MoUs with several players to give a boost to incentivize solar adoption. In the wake of these developments, Servotech Power Systems Limited, a Delhi-based provider of end-to-end solar solutions, has started a super distributorship program in Jaipur and signed an MoU with Leelmax Power Solution to extend its partner network in Rajasthan.

On this occasion, Servotech's Vice President Channel Sales Kulbir Singh noted, "Servotech being the leading manufacturer of complete solar solutions has long been delivering several major solar projects in India. Segueing into channel sales will surely ensure greater product outreach and spread solar energy in towns and villages to contribute towards reducing carbon emissions and shaping a better ecosystem for the world. Since Rajasthan is a major solar hub, this will help us take the first step in the right direction of achieving our goal of greener and smarter living."

Servotech's Sr. GM - Mahesh Rawat opined, "We've started our super distributor in Jaipur, Rajasthan and will be supplying our complete product range to all districts of Rajasthan. This will help in immediate reach and spread of products and will augment speedy after-sales operations. A similar model will be replicated in states of Maharashtra and Gujarat aligning with company's vision, strategy, and yearly targets."
